

G-70 Database Manager Install (PC)

Roland Europe S.p.A. bear no liability in the event of loss of data.

We strongly recommend a backup of your G-70 data before using G-70 Database Manager.

Cautions after an exporting into G-70!!!

When all files have been copied on G-70, terminate the USB connection using the tray icon at the right of your computer's tool bar.

The tray icon related to the USB connection looks like a green arrow on top of an electronic device.

Leave the mouse pointer on this icon and wait for the "Safely remove hardware" message to appear.

Using the left mouse button, double-click this icon to open a window that lists all hardware devices that are currently connected to that USB port.

Select "USB mass storage device" and check at the bottom whether the description refers to your G-70 ("G-70 mass storage device").

Click "Disconnect", and in the next window "OK". Wait until a message informs you that you can disconnect the hardware.

Click "OK" to close this window.

An inappropriate disconnection can cause a loss of data.

Software Requirements.

G-70 Database Manager requires Microsoft ® Windows 98/Me/2000/XP.
